

AMIR HAKIM

Junior Mobile Application Developer

Ipoh, Perak | +60 12-345 6789 | amir@test.com

PROFESSIONAL SUMMARY

Information Technology graduate with hands-on experience developing Android and Flutter mobile applications, integrating REST APIs, and working with MySQL-backed systems. Interested in mobile application development, API integration, and software engineering, with a strong foundation in Java, Android, Flutter, Git, and relational databases.

TECHNICAL SKILLS

Mobile Development	Android, Flutter
Programming	Java
Backend & APIs	REST API integration
Database	MySQL
Development Tools	Git

EDUCATION

Bachelor of Information Technology

Malaysian Higher Education Institution | Expected 2026

Relevant areas: mobile application development, databases, software engineering, web technologies, and API-based systems.

RELEVANT EXPERIENCE

Mobile Application Development - Academic Projects

Information Technology Programme

- Developed Android mobile application features using Java and standard Android development practices.
- Built cross-platform mobile interfaces using Flutter for application prototypes and coursework.
- Integrated mobile applications with REST APIs to retrieve and submit application data.
- Worked with MySQL-backed systems to support persistent application data.
- Used Git for source control and iterative development.

SELECTED PROJECT

Mobile Job Discovery Application

- Designed and developed mobile application functionality for job discovery and user profile management.
- Implemented API integration between the mobile frontend and backend services.
- Applied Java, Android, Flutter, REST API, MySQL, and Git skills in an end-to-end application workflow.

CAREER INTERESTS

Android development • Flutter development • Mobile application engineering • API integration • Software development
