

JASON WONG

Junior Software Developer

SYNTHETIC TEST RESUME FOR JOBMATCH OCR/NLP EVALUATION

This document contains fictional test data and is not a real person's resume.

PROFESSIONAL SUMMARY

Junior Software Developer with knowledge of Java, JavaScript, MySQL, REST API development, Git, HTML and CSS. Experienced in developing web applications and REST-based software projects, working with relational databases, testing application features, and maintaining source code with version control. Interested in software engineering, backend development and database systems.

TECHNICAL SKILLS

Programming	Java, JavaScript
Web Development	HTML, CSS, REST API
Database	MySQL, SQL, relational database design
Tools	Git, GitHub, Postman
Software Practices	Debugging, API integration, functional testing, version control

EDUCATION

Bachelor of Computer Science

Relevant study areas: software development, programming, databases, web application development, software engineering and system analysis.

PROJECT EXPERIENCE

Web Application Development Project

- Developed application features using Java and JavaScript.
- Built and integrated REST API functionality for application data exchange.
- Used MySQL to store, retrieve and manage structured application data.
- Created responsive interfaces using HTML and CSS.
- Used Git and GitHub for source code version control.

Software and Database Project

- Designed relational database tables and wrote SQL queries.
- Connected application logic with MySQL database operations.
- Performed debugging and functional testing to identify software defects.
- Tested REST endpoints and verified application responses using API testing tools.

CORE STRENGTHS

Software application development; database systems; REST API integration; problem solving; debugging; teamwork; source code management; willingness to learn new technologies.

TARGET ROLE

Seeking a Junior Software Engineer or Software Developer position involving application development, testing, maintenance, REST APIs and database systems.
